(54) PHOTOGRAPHING DEVICE

(57)Abstract:

PURPOSE: To record a photographed picture without keeping a user waiting by monitoring the operation states of plural printers to select and control an operatable printer and allowing the next photographing operation to shorten the interval of the photographing time.

CONSTITUTION: A recording condition is set by the operation of a photographing operation part 13, and the picture of an object photographed by an electronic camera 22 is stored in a picture storage part 28 by a write part 27. The photographed picture stored in the storage part 28 is recorded by a printer 30; and at the time of this recording, operation states of plural printers 30 are monitored by a control part 50, and the operatable printer 30 is selected and controlled to record the photographed picture. Since the operation part 13 can be operated and the next user can perform the photographing operation

when the photographed picture is recorded on recording paper by the printer 30, the interval of the photographing time is shortened, and the photographed picture of the object is recorded on recording paper without making the user waiting.
